Course Descriptions

Starting with the number 1 as your top choice, rank the classes listed below based on your interest in expanding and developing new techniques in each area. Indicate for what grade and subject you currently provide instruction.

Rank Preference	Currently Instructing			Course Description
	E K-6	MS 7-9	HS 10-12	
				Chemistry: The branch of science that deals with the composition and properties of substances and various elementary forms of matter.
				Earth Sciences: The branches of science such as geology, geophysics, geochemistry, or geodesy, concerned with the earth; an earth science
				Life Sciences: The branches science that deals with living organisms, their life processes, and their interrelationships, as biology, physiology, or ecology.
				Robotics: The study of technology used for the implementation of computer-controlled robots to perform manual tasks, especially on an assembly line.
				Algebra I, II: The branch of mathematics that deals with general statements of relations, utilizing letters and other symbols to represent specific sets of numbers, values, vectors, etc., in the description of such relations.
				Geometry: The branch of mathematics that deals with the deduction of the properties, measurement, and relationships of points, lines, angles, and figures in space from their defining conditions by means of certain assumed properties of space.
				Trigonometry: The branch of mathematics that deals with the relations between the sides and angles of plane or spherical triangles, and the calculations based on them.
				Calculus: A method of calculation, especially one of several highly systematic methods of treating problems by a special system of algebraic notations, as differential or integral calculus.
				Engineering: The study of the art/science of mechanical, chemical, and/or electrical systems used for practical application of the knowledge of pure sciences, as physics or chemistry, as in the construction of engines, bridges, buildings, mines, ships, and chemical plants.

How did you hear about TOSS?
